

## IMG Denali Expedition Prep Seminar Equipment List

This program is the perfect opportunity for climbers headed to Denali to test out their gear! We urge these climbers to use the equipment they are planning to use in Alaska. For climbers who haven't acquired everything, that's okay. You can use this time to decide which pieces of gear are right for you. We have some gear available to rent to fill the gaps. The right equipment is paramount to your success. Below you will find a detailed list of gear required for this course. Unless otherwise noted, all gear on this list is required. Items that are available to rent are indicated, and feel free to browse our [rental department](#) for modern, high quality mountaineering equipment at a very reasonable price. Please note that advanced reservations for rental equipment on Mt. Rainier is not required.

All programs will include a detailed gear inspection from the lead guide. We want to help you find a layering system that is weight conscious and conditions appropriate. If you are trying to decide between multiple pieces of gear, bring both, and let your guide help you choose. For more info on gear, check out our [Boot Blog](#) and [Layer Guide](#) written by Supervisor Porter McMichael to help you pick the gear that's right for you.
