

Everest 2015 with IMG

I've been organizing Everest expeditions for over 30 years, and each year I do my best to put together a strong team with compatible climbers and top notch western and sherpa guides and leaders. We fill our trips, and thus can be picky; we've turned away many climbers who I feel will not be a good fit with our program.

IMG has long been a leader in innovative climbing programs to the Himalayas. We were one of the very first companies to offer guided programs to Everest (1991), the first to company to offer a stand-alone climb to the North Col (1994) and to 8000m (2001). We were one of the first companies to guide Shishapangma (1990) and Cho Oyu (1995), first to guide Khumbu Icefall as a stand-alone program (2000), first to offer the option of personal sherpa guides to climbers (2002), first successfully guided climb of Lhotse (2009), first with the Hybrid concept (2010), first to offer an Everest "Express" itinerary (2010), first to rappel alternate route around Hillary Step (2013).

With over 600 summits of 8000 meter peaks to our IMG credit, including over 380 of them on Mount Everest, I am still never satisfied and continue to look for ways to improve our IMG Everest program. For 2015 we continue our tradition of innovation and attention to the details. We put in place first class logistics and staffing. We don't cut corners. My goal is to conduct the very best program that we can, at a fair price. I don't think you will be disappointed.

If you would like to join a world-class team on Everest, please give this Everest 2015 document a careful reading and then contact us if you would like further information!

Please let me know how we can be of further assistance.

Eric Simonson
IMG Himalayan Programs Director

Everest: Just The Facts

Summit:
29,035' • 8850m

Set Your GPS:
27' 59' N 86' 56' E

First Boot-Prints on Top:
In 1953, Edmund Hillary and Sherpa Tenzing Norgay became the first known summiters of Everest (neither saying who stepped on top first.) Some people speculate about the success of British climbers George Mallory and Andrew Irvine who perished on the north side of the mountain high on a summit attempt in 1924. In 1921, Mallory was part of the first ever expedition to Everest.

Size Does Matter:
The elevation of 29,035' (8850m) was determined using GPS satellite equipment on May 5, 1999. It was previously believed to be slightly lower (29,028'/8848m), as determined in 1954 by averaging measurements from various sites around the mountain.

As India Slides Under China:
GPS research suggests that plate tectonics is causing Everest to grow 3-5mm and move 27mm northeast annually. The mountain is 60 million years old and is believed to have once been a seabed. While seashells haven't been found on the summit, there are rocks that had once made up the Tethys ocean floor.

By Any Other Name:
The Tibetans call Mount Everest "Chomolungma" which means "mother goddess of the world." Once known to westerners as Peak XV, it was named in 1859 for Sir George Everest, the British surveyor-general of India. The Nepali name is Sagarmatha which translates to "churning stick in the sea of existence."

No Longer Just for Loners:
More than 4,000 climbers have climbed to the summit over 6800 times by various routes.

EVEREST 2015

Program Descriptions and Logistics

The Everest climbers and trekkers will travel to Base Camp in three separate teams, each led by IMG guides and sherpas. For the 2015 expedition:

Guided climbers -- arrive Kathmandu on March 25th.

The Western guided climbers will include our 1:1, 1:2, and 1:4 (Hybrid) climbers. For the trip to Base Camp, this team will be joined by our first EBC Classic Trek team.

Classic climbers -- arrive Kathmandu on March 28th.

The Sherpa guided Classic team will be joined by our second Classic EBC Trek team on our way to Base Camp.

Lobuche, C2/C3, and Lhotse climbers -- arrive Kathmandu on March 31st.

The Lobuche, C2/C3, and Lhotse climbers will be accompanied by our third Classic EBC Trek team.

Lobuche Base Camp

Our new Lobuche Base Camp strategy has been working great the last few years, and we will do it again for 2015. This means the climbers and trekkers skip the lodges of Lobuche village and Gorak Shep. Three nights of camping at Lobuche BC and gorgeous day hiking in the area provide excellent acclimatization so our climbers and trekkers will feel good when it's time for them to move up to the Everest Base Camp! We'll have our own sherpa cook team preparing meals at Lobuche BC to keep our team members healthy.

Everest Base Camps

In our ongoing effort to constantly improve our IMG program, for 2015 we will have two separate (adjacent) base camps, one for the Classic climbers and one for the Guided climbers. Each camp will have a separate dining, toilet, shower, and kitchen facilities. In between the camps we have our common meeting facility—the giant Eureka Military MGPTS tent, complete with 70,000 BTU military hazmat tent heater that runs outside the tent and pumps the heated air inside (so no danger of carbon monoxide). This is the place to be if you want to hang out in a carpeted and warmed environment, watch movies, read, work on the computer, make a phone call, or just socialize! We have good charging capacity with both 12v solar and backup generators. We have wireless internet now available at Base Camp (est cost \$200 per person for the season). In our Command Center Jangbu and Greg have a VHF radio base station, large antennas that let us communicate well with the South Col and all the way down to Pheriche. We subscribe our climbers and Sherpas to the service provided by the HRA Base Camp Medical Clinic so you have available to you unlimited consultation to the doctors.

Food

Nothing is more important to health and morale on a long trip than good food. We have very experienced Lobuche BC, Everest BC, and Everest Camp 2 Sherpa cook teams. At Base Camp they bake fresh bread, rolls, cakes, etc on a daily basis. We receive regular deliveries of fresh fruit, vegetables, and meat to Base Camp in addition to staples purchased in Kathmandu and "goodies" brought from USA. Most climbers will spend about two weeks at high altitude (over 6000m/20,000ft) during the course of the trip, when appetites really wane and life is truly miserable. We encourage climbers to choose their high altitude food items at Base Camp from our food supply tent, and bring the food up with you (your personal Sherpa can assist), so you know exactly what you will be eating up high. For climbers, we also suggest that you bring from home about 10 pounds/5 kg of additional high altitude "lunch" snacks so you will have food for high altitude that you know you can eat up high, where many people's appetites become very finicky and it is hard to eat.

EVEREST 2015

Dates and Prices

NOTE ON DATES: Dates are listed starting with the arrival day to Kathmandu to the return day back to Kathmandu from Lukla at the end of the trip.

The ending dates for the **EBC Classic Trek, Sherpa Trek, and Lobuche Climb** are **FIXED**, but you should add one contingency day in Kathmandu at the end, before flying home, in case of Lukla flight delay.

The ending dates for the **C2, C3, Everest and Lhotse Climbs** are **FLEXIBLE**, depending on weather and conditions. **It would be prudent to add at least one week of contingency days to these itineraries.** Normally climbers will reconfirm or change their homeward departure flights when you know exactly when the expedition is going to end for you (contact your travel agent from Everest BC). We plan to stay at Base Camp for climbing until approximately the end of May.

DETAILED ITINERARIES: http://www.mountainguides.com/pdf/Everest_Itineraries2015.pdf

EVEREST CLIMBS		
Hybrid IMG Everest Climb with 1:1 sherpa and 4:1 western guide	March 25 – May 19, 2015 (plus contingency days)	\$59,000
IMG Everest Climb with 1:1 western guide	March 25 – May 19, 2015 (plus contingency days)	\$114,000
Classic IMG Everest Climb with 1:1 sherpa guide	March 28 – May 22, 2015 (plus contingency days)	\$44,000
Everest Express Climb	Details for this option depends on the schedule and service desired by the climber	variable
LOBUCHE, C2/C3, LHOTSE CLIMBS		
Lobuche Peak Climb with western and sherpa guides	March 31 – April 23, 2015	\$5,000
Khumbu Icefall Climb to Camp 2 with 1:1 sherpa guide	March 31 – May 3, 2015 (plus contingency days)	\$10,000
Khumbu Icefall Climb to Camp 3 with 1:1 sherpa guide	March 31 – May 3, 2015 (plus contingency days)	\$12,000
Lhotse Climb with 1:1 sherpa guide	March 31 – May 25, 2015 (plus contingency days)	\$21,000
EVEREST TREKS		
Classic Everest Trek with Guided team and several nights at EBC	March 25 – April 13, 2015	\$4,000
Classic Everest Trek with Classic team and several nights at EBC	March 28 – April 16, 2015	\$4,000
Classic Everest Trek with Lhotse team and several nights at EBC	March 31 – April 19, 2015	\$4,000
Sherpa Trek to Base Camp with sherpa guides. Includes several nights at Base Camp.	April 27 – May 14, 2015	\$3,000

PROGRAM DESCRIPTIONS

Classic IMG Everest Climb with 1:1 sherpa guide	March 28 – May 22, 2015 (plus contingency days)	\$44,000
--	--	-----------------

This is the program which the majority of our IMG climbers have done over the years and is perfect for the climber with previous experience on big mountains. This is a complete expedition: no cutting corners, nothing less than the finest support on the mountain and offering you the ultimate in flexibility to tailor your schedule to your personal needs. This program is led by an IMG senior guide Greg Vernovage and Ang Jangbu Sherpa (both Everest summiters) and includes unlimited consultation with the IMG staff, consultation with the docs at the HRA BC Medical clinic, Icefall fees, all expedition food, communications, oxygen, Sherpa support, complete trek service, and total expedition logistics from Kathmandu to Kathmandu. We assign your personal sherpa guide to you at the beginning of the expedition, and you climb together over the acclimatization rotations, developing familiarity and friendship. IMG does not allow members to climb solo. Our itinerary includes staying at our custom Lobuche Peak base camp for great acclimatization hiking on the way to Everest BC at the beginning of the expedition, a subsequent ascent of Lobuche for further acclimatization and training prior to the first rotation on Everest, then two acclimatization rotations (one to C2 and one to C3) prior to the Everest summit bids. The goal is maximum practice and acclimatization before going high on Everest, for the best possible chance of success.

Hybrid IMG Everest Climb w/ 1:1 sherpa AND 4:1 western guide	March 25 – May 19, 2015 (plus contingency days)	\$59,000
IMG Everest Climb with 1:1 sherpa AND 1:1 western guide	March 25 – May 19, 2015 (plus contingency days)	\$114,000

Many of our customers have told us they want the oversight of a Western Guide in addition to the individual attention provided by a personal Sherpa Guide. Now we have what you are looking for! Join seasoned IMG Everest guides and great sherpas for a guided program that combines the best of both. The general itinerary for the Western Guided program is the same as the Classic climb, but the Western Guided climbers will travel separately to Base Camp and will have a separate Base Camp. For the customer who is not cost sensitive, and who wants the optimum support, we assign one of our senior IMG guides (who is an Everest summitter) on a 1:1 basis. This is the Cadillac program for the discerning climber who wants the very best.

Classic Everest Treks		
Classic Everest Trek with Guided team and several nights at EBC	March 25 – April 13, 2015	\$4,000
Classic Everest Trek with Classic team and several nights at EBC	March 28 – April 16, 2015	\$4,000
Classic Everest Trek with Lhotse team and several nights at EBC	March 31 – April 19, 2015	\$4,000

The trek to Everest BC is one of the world's classic human powered adventures! We have three trekking departures to Base Camp; each trek accompanies the IMG climbing team with sherpa and western guides and sees all the famous sights on the way up the Khumbu Valley. Our itinerary includes staying in lodges between Lukla and Pheriche, then in our custom Lobuche Peak base camp (for fantastic acclimatization hiking) for several nights prior to moving on up to Everest BC at the beginning of the expedition. Rub shoulders with the climbers and see what a real expedition is like. Climb Kala Pattar, hike up to the base of the Khumbu Icefall and get some photos, then join in with the expedition puja ceremony at Base Camp. You stay overnight at Everest Base Camp as a guest of the expedition; only trekkers associated with expeditions are allowed to stay at EBC. Then, trek back out to Lukla with our crack Sherpa team for the flight to Kathmandu. What a classic! We have a limited number of positions available on these Classic EBC Treks, accompanying our three climbing teams.

Lobuche Peak Climb with western and sherpa guides	March 31 – April 23, 2015	\$5,000
--	----------------------------------	----------------

If you would like to visit Everest Base Camp, and stay longer and go higher, bring your crampons and ice axe and add a climb of Lobuche Peak, to over 20,000 feet (we stop at the false summit—the real summit is very difficult technical climbing). Our itinerary includes staying in lodges between Lukla and Pheriche, then in our custom Lobuche Peak base camp (for fantastic acclimatization hiking) for several nights prior to moving on up to Everest BC at the beginning of the expedition. Then our Lobuche climbers, guides, and Sherpas will drop one day back down the valley to climb this beautiful peak, with world class views of Everest from the summit. Afterward, trek back out to Lukla with our crack Sherpa team for the flight to Kathmandu. From the beautiful Lobuche Base Camp tucked up a side valley from the EBC trek route, the route climbs to a high camp, then from there up rock scrambling to the glacier, which leads to the summit ridge. The steeper parts of the climb to the ridge are normally fixed with about 500 meters of rope. Lobuche Peak is a perfect objective if you are fit and have Mt. Rainier type skills. (ice axe, crampons, roped glacier travel). We will review use of fixed ropes for climbers who have not done this before.

Khumbu Icefall climbs to Camps 2 and 3		
Camp 2 w/Sherpa guide @ 1:1 ratio	March 31 – May 3, 2015 (plus contingency days)	\$10,000
Camp 3 w/Sherpa guide @ 1:1 ratio	March 31 – May 3, 2015 (plus contingency days)	\$12,000

Our Khumbu Icefall programs are for the climber who wants an up close and personal Everest experience without a summit attempt! All climbers join the Lobuche Peak itinerary with IMG western and sherpa guides, for instruction and evaluation. Then, you climb the famous Khumbu Icefall and beyond with your 1:1 sherpa guide. This is serious climbing, with some risk, so you need to be in good shape and have solid skills with crampons, fixed rope, etc. Camp 3 climbers will be provided oxygen for you to practice with as you climb the Lhotse Face to Camp 3. For the really fit and adventurous climber, if you are thinking about coming back to climb Everest someday, this is great practice!

Lhotse Climb with 1:1 sherpa guide	March 31 – May 25, 2015 (plus contingency days)	\$21,000
---	--	-----------------

Lhotse climbers accompany the Lobuche climbers to EBC, and for the acclimatization climb of that peak. After that, we have two rotations planned (same as for Everest climbers) to ensure that you are ready to ascent the world's 4th highest peak. The Lhotse route follows the Everest route to above the Yellow Band, then splits off to "Lhotse Camp 4". Lhotse is a stiff climb, more difficult than Cho Oyu. Our Sherpa team will fix the route all the way to the summit, but there is steep ice and rock in the Lhotse Couloir so you need to be very fit and capable. We figure you will use oxygen starting at C3 on the summit rotation, then from C3 to Lhotse C4, overnight there, and on summit day. The goal would be to descend to C2 after the summit. IMG has now done five Lhotse climbs, each successful ('09,'10,'11,'12,'13).

Everest Express Climb	Details for this option depend on the schedule and service desired by the climber	variable
------------------------------	--	-----------------

For experienced climbers, we provide the option of a shorter itinerary and a different acclimatization profile. We can tailor the itinerary to shorten the total length of the expedition buy using pre-acclimatization, additional oxygen, and use of helicopter to expedite travel to and from Base Camp. Please contact Eric Simonson to discuss this program and various alternatives.

Sherpa Trek with sherpa guides	April 27 – May 14, 2015	\$3,000
---------------------------------------	--------------------------------	----------------

Our Sherpa led Everest trek, with top notch support and logistics, this group also visits the team at Base Camp, near the end of the expedition, normally about the time of the summit bids. This is an exciting time to be there! After the Base Camp visit, trek back out to Lukla with our crack Sherpa team for the flight to Kathmandu. With a slightly accelerated itinerary, you can do this trip in 3 weeks of vacation!

Program Fees and Payment Schedule

Costs included in trip fee: Transfers between hotel and airport in Kathmandu, hotels with breakfast in Kathmandu for stated itinerary at beginning of expedition, welcome dinner in Kathmandu for members traveling on published itinerary, round-trip flight to Lukla, all group equipment including rope, tents, stoves, propane shower at BC, etc., all meals once trip starts (since appetites are sensitive at high altitude, we suggest climbers bring some favorite high altitude snacks which they like to eat), Park fees and climbing permit fees, liaison officers, Sherpas, camp staff, radio communications, 110v power supply at Base Camp for charging electronics (solar and generator backup), yaks and porters, hyperbaric bag, pulse oximeter, emergency medical oxygen, unlimited medical consultation at the HRA EBC Medical clinic. High speed internet is available at Base Camp @ \$200/person for the season. All trekkers and climbers are provided with a foam trekking mattress for BC. Everest, Lhotse, C2, C3, climbers will be provided a single tent at Base Camp, high-altitude camp equipment, Sherpa support, and unlimited consultation with the IMG leaders. Climbing Sherpas will establish the route and camps, carry both team gear and a reasonable amount of your personal member gear (for example your sleeping bag, down suit, high altitude food and gear, can be sent up to C2 with sherpas). Each climber/sherpa team will be provided a handheld radio. Everest climbers will be provided 7200 liters of climbing oxygen as follows: 1800L at C3, 3600L at Col, 1800L at Balcony. This includes sleeping oxygen at Camp 3 and 4 on the summit bid and oxygen for "practice" at Base Camp prior to the summit bids. Additional oxygen and additional Sherpa support is available, but must be arranged before the expedition. Please contact Eric Simonson or Greg Vernovage for additional details of summit climbing program.

Costs not included in trip fee: International round-trip air fare and travel expenses to/from Nepal/KTM, meals in Kathmandu, hotels in Kathmandu after the trek/climb, personal gear, excess baggage charges, airport taxes and Nepal entry visas, tip pool, internet, satellite phone, personal sundries and beverages, costs incurred as a result of delays or events beyond the control of IMG, required insurance coverage (medical, rescue/repatriation) and customary but optional tips for sherpas and IMG staff.

REQUIRED insurance: Everest climbers will need at least \$30,000 of helicopter rescue coverage (to cover helicopter from Camp 2) and Trekkers/Lobuche climbers need at least \$10,000 of rescue benefit (to cover helicopter evacuation from Everest Base Camp). Your policy must also cover the repatriation of your remains. More information: [cancellation, rescue/repatriation insurance](#) or contact the IMG Office.

Tips: We will collect for a tip pool, and ask the trekkers to please contribute \$200, Lobuche/C2/C3 climbers \$300, and Everest/Lhotse climbers \$500. We will collect this in Kathmandu and distribute this after the trip on behalf of the team as a thank you gift to the many unsung people that make the whole operation run smoothly: the porters, trek staff, cooks and helpers, hotel staff, Kathmandu staff, climbing sherpas, and others. You may **also** wish to provide additional tip to your personal Sherpa and IMG staff.

Single Supplement: We can reserve a single room in the hotel in Kathmandu for you, and you can pay the upcharge at the front desk. No problem. While on the trek most of the lodges have two beds per room and it is often difficult to reserve single rooms in the lodges if they are very busy. If there is a single room available, you can pay the upcharge and have it. **Extra Nights at EBC: \$100 / night**

Fee Payment Schedule for 2015 Everest programs:

Payment Due Date	BC Treks, Lobuche, C2/C3	Lhotse Summit Climbs	Everest Summit Climbs
Application Fee	\$1,000	\$5,000	\$10,000
Oct. 17, 2014	\$1,000	\$2,500	\$10,000
Dec. 19, 2014	Balance	Balance	Balance

All IMG program fees are quoted in US dollars. All fees and payments are non-refundable and non-transferable. Payments must be received by IMG on or before the due dates noted above. Failure to submit payments on or before these due dates will result in forfeiture of fees paid and loss of program reservation. Our bank does not charge for incoming bank wires, however, please include wire fees charged by your bank or correspondent banks.

Expedition Organization and Leadership

International Mountain Guides (“IMG”)

IMG is the oldest and most respected high-altitude climbing service in the world and its three principals, Eric Simonson, Phil Ershler, and George Dunn, have led and organized hundreds of expeditions worldwide since 1975. Each is an AMGA Certified Alpine Guide with Himalayan expedition experience including Everest, K2, Kangchenjunga, Shishapangma, and Cho Oyu. IMG’s Himalayan mountaineering programs are organized and directed by Eric Simonson, one of the world’s premiere expedition organizers. Under his direction IMG has conducted over forty-five Himalayan expeditions. His teams include a group of professionals and Sherpas who are the best in the business. Since 1990, over 600 IMG team members have summited the world’s classic 8,000-meter peaks, including Everest, Lhotse, Cho Oyu and Shishapangma.

Ang Jangbu and the IMG Sherpa Team

A veteran of dozens of expeditions and an Everest summiter, Ang Jangbu has worked with Eric Simonson on every IMG Himalayan program since 1991 and is a very popular leader. Ang Jangbu Sherpa and his staff put together one of the very best Sherpa teams for IMG. We are proud to have a group of Sherpas working for us who are among the best paid, best led, best equipped, and best trained in the business.

References

Joining a high-altitude trek or expedition is a serious decision. You should be completely confident in the organization and leadership before you make that decision. Many of you have climbed with us before, and because your experience with us was good, you’re considering another climb with us. For those of you who haven’t climbed with us before, we strongly encourage you to interview us thoroughly and also talk to our past clients. When you’re ready to make the decision, we’ll be happy to provide you with a complete list of references.

IMG’s Everest Philosophy

IMG leads the way! Our goal is to minimize risk while helping as many members as possible reach their goal, and we invest in the logistics and manpower to make this possible. We will not sit back and let other teams do the work. Invariably, our IMG Sherpas are part of the rope fixing efforts and the first team to the summit, preparing the route for future summit bids. We value our reputation as one of the premiere international climbing companies. If you would like to join a world-class team on Everest, we encourage you to contact us to discuss your goals and qualifications for membership in the IMG Everest team!

“I could go on and on, but the bottom line is that your organization is first-rate in every respect. Thanks for everything... I hope to make use of your services again...”

—Tom G.

“I’m writing to you for several reasons, the foremost of which is to thank you for providing me with an excellent trip to Everest... I can’t say enough good things about both the logistics and the staff. As you know I am a crusty old IFMGA mountain guide with previous experience on the mountain, and so I had plenty of ideas about how the trip should go and what was possible. Your expedition service surpassed all my expectations, provided me with “the best” opportunity to summit even compared to the super expensive guided trips, and as such, I was successful in fulfilling a dream of 20 years... I will recommend your service to anyone interested... it was simply the best on the mountain. How do you keep the price so low? The facilities, equipment, and staff equaled surpassed any service on the mountain, even the expensive ones. Anyway, thanks again for a perfect trip!”

—Dan G.

Things to Consider

We know we're not the cheapest deal around, and we don't want to be. We spend more providing the best personnel, equipment, logistics and safety measures – things that many lower-cost programs cannot afford and do not have. We don't cut corners. As you shop around, consider the following:

- **IMG** leaders are professionals and are great teachers as well as strong climbers. All have done numerous high-altitude expeditions, including the Himalaya. Our clients enjoy the immense benefit of a core group that has climbed together extensively, producing a team that knows how to work well together. We do not think you will find any other Everest climbing or trekking programs that will be led or staffed by persons of the caliber we will field for Everest 2015. We challenge you to try!
- **IMG** always complies with all local, state, federal, and international regulations for the countries in which we climb. This includes proper visas and climbing permits, full insurance and equipment for our employees and Sherpa support teams, and complete adherence to all environmental regulations. Our great safety record allows us to operate with full liability insurance. All client funds are deposited in a regulated trust account. We take our business seriously!
- **IMG** Sherpas are top-notch. We hire the same great Sherpas every year, we treat them with respect, we pay them well and they like working with our teams. Most of them have been on many climbs with us over the years and many of them have multiple Everest summits. Our enthusiastic cooks do a great job and our menus are well considered. It makes a difference!
- **IMG** trek itineraries are longer than most others offered on the market. We know how to acclimatize properly and we don't rush. Unlike most other teams, we actually take our trekkers to Base Camp and invite them to stay there for several days as members of an expedition team. If you want to trek to Everest Base Camp, go with a team that actually gives you a real chance to fully experience it!
- **IMG** Base Camp is fully stocked with double wall dining tents with carpets and heaters, top notch food (fresh food delivered weekly), propane heated showers, custom weather forecast, high speed internet for your personal e mail is available @ \$200/person. Solar power at Base Camp quietly supports our satellite communications, allowing us to maintain excellent emergency contact capabilities and keep friends and family informed of our progress during the long weeks away from home. IMG will post regular internet dispatches from all of our teams during Everest 2015. We have a generator for backup on the inevitable snowy/cloudy days, and 110v power for charging your electrical devices.

Air Travel and Insurance Arrangements

International Mountain Guides has worked for many years with Ms. Pirjo Dehart and her staff at CTT Destinations to provide professional travel service for participants in our programs. We urge you to contact CTT Destinations at 800/909-6647 or img@cttdestinations.com for help with your plans.

We invest in insurance coverage for commercial liability and medical and disability insurance for our employees and Sherpas while participating on our programs. We cannot insure you for your personal needs, but we do expect you to be as fiscally responsible as we are. We require that you insure yourself against potentially expensive difficulties that may arise. First, Trip Cancellation Insurance may provide financial relief should you be forced to withdraw from the program before it even happens. Next, make sure you have adequate Travel Insurance for coverage should you have a problem during the trip. Medical care and evacuation in remote locations can be expensive. For more information, please see our page on [Trip Cancellation and Travel Insurance](#).

“A lot of people have asked me about my trip and I've told them that if they ever want to go on a altitude oriented adventure, to connect with the guys at IMG. You run a great show...”
—W.G.S.

“We put a lot of effort and research into choosing the right way to go for Everest, and I left the mountain without a doubt that we chose and were with the best organization and people on the hill. I think most of the rest of base camp knew it too.”
—Jeff

For more comments from IMG climbers, please see: www.mountainguides.com/comments.shtml

Everest Personal Equipment Checklist

This equipment list is meant to help you compile your personal gear for a high altitude trek or climb. Most items are required. Please consider each item carefully and be sure you understand the function of each piece of equipment before you substitute or delete items. Don't cut corners on the quality of your gear.

Travel Items

- Duffel Bags: One duffel will accompany you on the trek to BC. Climbers will need a second duffel, which will be packed with the mountain equipment and which will go direct to BC. Duffels are carried by porters and yaks and should be sturdy and waterproof with name written on bag (in case tag is lost). Bags with wheels are nice for the airport, but the porters and yaks don't like to carry them, so don't bring wheeled bags. You will also store some travel clothes at the hotel in Kathmandu while trekking, so a smaller additional bag with a lock might be handy. Tip: Bring 5 large plastic garbage bags to pack gear inside duffels to protect gear from rain.
- Daypack: Large daypack or bag with a shoulder strap, so you don't have to set it down while doing the duffel shuffle or handling travel documents while going through passport control and customs at the airport. It needs to be big enough to hold everything you'll need for an overnight stop.
- Locks: You'll want padlocks in Nepal and Tibet, but for flying out of the USA, it might be better to use plastic zip ties which can be cut by TSA staff if necessary (bring extra zip ties).
- Travel Wallet: Important for carrying your important documents including passport, extra photos, duffel inventory list, and money. We suggest that you use a travel wallet that you can hang around your neck and place inside your shirt, or around your waist tucked under your shirt or trousers.
- Passport (valid for at least 6 months after the trip ends with sufficient extra pages for visa stamps and in **same name as airline ticket** (or with endorsement-for women who changed name w/ marriage). Get your Nepal visa on arrival in Kathmandu at the airport (\$40 for trekkers, \$100 for climbers).
- As many as 7 additional passport photos: one for Nepal visa, one for trek permit, one for application to purchase a local sim card (if you have a GSM cell phone), one for Lobuche permit, one for HRA BC clinic. Everest and Lhotse summit climbers bring two more (in case visa extension is needed, and one for your summit certificate - hopefully you will need this!).
- Photocopy of passport and photocopy of flight itinerary

Trekking Gear

- Trekking Poles: Get collapsible poles that can attach to your backpack.
- Backpacks: The "day pack" is great for a travel carry-on and may be big enough for the trek (need room for your clothes, water, camera, food, etc during the day while hiking). Climbers will need a larger pack (60 liter size is popular) and this will also be fine for the trek. For the international flights put your backpack into the duffel bags, but carry it on the plane for the Lukla flight.
- Pack Cover: Waterproof rain cover for your pack.
- Sleeping Bag: Rated to at least 0 degrees Fahrenheit. Synthetic or Down. Base Camp can get down to around 0-10 degrees F at night...so quite chilly. Everest and Lhotse climbers will want to bring a second sleeping bag (available for rent if you do not have a suitable one).
- Trekkers do not need a pad (foam mattress provided for trek and Base Camp). Climbers should have a Thermarest, NeoAir, or similar lightweight pad to augment the closed cell pads in higher camps.

Footwear

- Lightweight Shoes: Running/tennis shoes and sandals for camp, around town, etc.
- Hiking Boots: Medium-weight hiking boots, waterproofed and broken-in.
- Gaiters: To keep snow, mud, and scree out of your hiking boots while trekking to Base Camp.
- Socks: at least 5 complete changes of socks, in a combination that you have used and know works for you. Make sure your boots are roomy enough for the sock combination you intend to use. Tight boots will make your feet cold. It is no problem to wash underwear, socks, etc at Base Camp!

Clothing

- Base Layer: 2 pair synthetic long johns: one midweight set and one expedition weight set.
- Mid Layers: One additional warm layer (wool sweater, another fleece jacket, shelled vest, etc, that can be worn in conjunction to the other layers).
- Shell Jacket: Waterproof/breathable jacket with hood.
- Shell Pants: Waterproof/breathable pants (full side zips are best).
- Climbing/Trekking Pants: Look for construction that provides freedom of movement and/or stretch materials. Fabric should be a breathable synthetic that preferably holds up to abrasion and dries quickly. You can wear them over longjohns if it is cold.
- Warm Parka: Down or synthetic. This should be big enough to go over other garments. Many climbers also like insulated pants for cold mornings and evenings at BC / ABC.
- Trekking Clothes: Light hiking pants and / or hiking shorts for warm weather down low- NOT cotton. Shirts for hiking on nice days (t-shirts OK, quick-drying synthetic fabric far better.)
- Casual Clothes: For travel/meals in dining rooms. You'll want a shirt or two with a collar to wear on flights and for restaurants. A sweatshirt or light jacket might be nice in the evening.
- Bathing Suit: Some of the hotels have pools (eg, in Bangkok).

Clothing Accessories

- Gloves: Light gloves for hiking and warm ski gloves. Bring mittens too if your hands tend to get cold.
- Hats: Warm wool or heavy fleece hat, sun hat and bandana.
- A "Buff" or light balaclava to breathe through in the cold dry air. Good for preventing "Khumbu cough"

Camp Accessories

- Headlamp: With several sets of extra batteries. Climbers should bring a second "back up" headlamp (Beware of headlamps which do not accept lithium batteries).
- Water Bottles: 2 water bottles with foam insulation shells. Bring a Pee bottle too.
- Water Treatment: Iodine tablets (Potable Aqua or similar) or iodine crystals (Polar Pure).
- Camera: With spare batteries, and film or memory cards.
- Pocket Knife.

Personal Accessories

- Wrist Watch: With alarm and light for reading in the dark. We like the Suunto ones.
- Eyewear: Bring good sunglasses. For contact lens wearers, ski goggles with light color lenses (for use at night) might be useful in windy conditions that cause blowing dust.
- Vision correction: Bring extra prescription eyeglasses or contact lenses if you wear them. Lens solutions are not widely available in Nepal, bring enough.
- Skin Care: Maximum SPF sunscreen and lip balm.
- Basic First Aid and personal: Bring plenty of hand sanitizer (Purell). Also you'll want moleskin, tape, aspirin (many climbers take an 81mg aspirin every day to prevent stroke), ibuprofen / acetaminophen, Imodium and Pepto Bismol for diarrhea, Band-Aids, antacid, insect repellent, ear plugs, and several rolls of toilet paper (we will have a supply at Base Camp), small towel, soap/shampoo, a few disposable dust masks, hand cream (for chapped hands),
- Prescription Medications: 1) Antibiotic for upper respiratory problems (azithromycin) 2) Antibiotic for GI problems (Cipro or azithromycin); 3) Diamox (acetazolamide) for acclimatization (125 mg tabs recommended, enough for a week); 4) Sleeping pills for jet lag; 5) Tylenol 3 or similar for severe headaches; 6) Malaria Chemoprophylaxis, if needed based on travel plans; 7) Asthma medication, if any history (many climbers use Advair inhalers at high altitude to prevent Khumbu cough); 8) nifedipine (for pulmonary edema); and 9) dexamethasone (for cerebral edema).
- Cold medicine (Sudafed, etc), Chloroseptic or Tessalon Perles throat lozenges.
- Personal Snack Food: Approximately 10 pounds of personal snacks, also some drink mixes if you like these (add drink mix to your water bottle after giving iodine tablets 30 minutes of contact time). Summit climbers should bring some extra high altitude snacks they know they will like to eat up high!
- Books/ Ipods/ Kindle. Plan on sharing among your team members. You can also borrow from and add to the Base Camp Library we establish every year.

Climbers add the following

- Ice axe: We like a general purpose axe in the 60-70 cm range. A wrist leash or tether to the harness is useful on steep slopes where losing an axe would be a big problem. A spike with a point is preferable to a tubular shape (which can glance off the ice at certain angles).
- Crampons: The number one rule with crampons is that they need to be compatible and stay on your boots, period! Petzl Vasaks, BD Sabertooth, Grivel G12 are all reasonable choices. Make sure your crampon straps are long enough to go around your big boots!
- Helmet
- Climbing Harness: We prefer a harness with a minimum of padding that can be adjusted to fit over bulky clothing with leg loops that open so you don't have to step into the harness.
- Ascender & Hardware: Two large locking carabiners, mechanical ascender with slings, rappel device (Figure 8 or ATC that will work on a variety of rope diameters from 7mm to 11mm), 4 extra 24" shoulder slings with 'biners. Bring 30 feet of 7 or 8mm accessory cord or ½ inch tape webbing to rig your ascender and safety sling (we will show you a good way to do this).
- Warm shelled mittens
- Plastic double boots are OK for Lobuche or Camp 2. For C3 and higher most climbers prefer the Millet Everest, La Sportiva Olympus Mons or other type high altitude boots.
- Insulated pants. Great for the cold evenings at Base Camp, and up higher.
- 1 pair of Glacier glasses, with a spare pair as backup.
- Bowl, Cup, Spoon.
- Small repair kit. We'll have a large repair kit at Base Camp with tools, etc.

Everest, Lhotse, and South Col Climbers additional equipment

- We would like to discuss this in detail with you individually to make sure you have the correct gear!! For C3 and higher we recommend a down suit (or down trousers and parka) and extra socks, warm mittens, goggles (including light yellow/ clear for night climbing), a good 1 liter thermos bottle, and other accessories. **Everest and Lhotse climbers will want to bring a second sleeping bag (available for rent).** We also suggest summit climbers bring a back-up headlamp and an extra 6 AA Lithium Batteries (for headlamp and walkie talkie back up at high altitude).

Immunizations Checklist

- Tetanus-Diphtheria** - You should already have. Do you need a booster?
- Polio** -You should already have. Do you need a booster?
- MMR** -You should already have. Do you need a booster?
- Meningitis** - Recommended. Consult your physician.
- Hepatitis A** - Recommended. Consult your physician.
- Hepatitis B** - Not a bad idea. Ask your physician.
- Cholera** - Ask your physician. Not usually recommended any more.
- Typhoid** - Not a bad idea to be safe. The tablet form, Vivotif Berna, is good for five years.
- Rabies** - The new vaccine is easy. Kathmandu and Nepal have rabid animals.
- Malaria** – No problem in Kathmandu, since we are above the zone of malaria, but if you plan on traveling to lower elevations in Nepal, or to certain parts of Thailand before/after the trip then malaria chemoprophylaxis is highly recommended.

Consult your physician and visit the travel clinic at a major University Hospital or your local Public Health Department for the most up to date info on travel requirements, or check out the Center for Disease Control Website at www.cdc.gov.

“Jangbu and all the Sherpas were the strongest on the mountain — by far. I can't say enough good things about them. They just outclassed everybody.”

—Bruce D.

IMG EVEREST 2015: Climbers' Update

Dear Team and Prospective Team members,

Eric Simonson here, I am IMG Himalayan Program director. I have organized over 45 Himalayan expeditions, including 22 on Everest. For Spring 2015, we are looking forward to our 23rd expedition to the world's highest mountain. We have seen over 380 climbers summit Everest with our IMG teams over the years. Among IMG clients in the past 7 years who reached the South Col, about 85% have gone on to reach the summit. IMG is an international guide service, and we welcome climbers from around the world.

"We support Climbers"

I have seen Everest change so much since 1982 when I first went to the mountain. Now you might have close to 1000 climbers and Sherpas on the mountain, so you will not be lonely! The negative side of this is that there are an increasing number of climbers on Mt. Everest that do not belong there, or who are poorly supported, so that if they have a problem, it might soon become your problem! To mitigate this we do a number of things. For example, we want IMG climbers empowered with the freedom and flexibility to leave early and get ahead of slow climbers and slow groups. We want to have in place the manpower and logistics to split our team up if necessary, to beat the traffic jams. If climbers need help, we want to have in place the support and logistics to be able to render assistance without negatively impacting our team members. If you want to climb with a large slow group, we suggest you seek another guide service. We have the logistics to support a variety of summit bid scenarios. Our goal is to provide great infrastructure, support, and flexibility to our climbers with a good fun team.

Sherpas

Most IMG Sherpas are from Phortse and Pangboche. We have a great crew of guys working for us, and many have been with IMG exclusively for over ten years. It is a tight knit bunch, managed by Ang Jangbu and Ang Pasang. The senior guys (the ones we assign to climb with our climbers) have solid English language skills, first aid and rescue training, and tremendous 8000m experience. For 2015 we have over 75 sherpas and cooks working for our customers – the largest and strongest sherpa team on the hill!

Prerequisites

If you are going to be a member of IMG Everest expedition, you need to be a solid climber. That means that you are in excellent physical condition, with good technical skills and previous altitude experience. You need to be proficient with crampons, fixed rope, ascenders, rappelling, and have climbed previously to at least 20,000 ft / 6000m and demonstrated your ability to acclimatize normally. Over the course of the Everest expedition (starting with the Lobuche climb and on the acclimatization rotations) we expect you to demonstrate your skills and fitness in order to qualify for the summit bids. The single most important thing that you can do to increase your safety on Mt. Everest is to minimize the time that you spend on the dangerous parts of the climb. This includes the Icefall, on the Lhotse Face, and in the Death Zone (above 26,000ft/8000m).

"IMG was clearly the leading team on Everest from base camp facilities to on-mountain support to the behind the scenes logistics. I had attempted Everest before and am very appreciative to Eric and the entire IMG team for my safe and successful summit."

—Alan A.

Guided / Non-Guided / Western-guided / Sherpa-guided

These terms all become pretty confusing these days. The IMG Everest programs are ALL guided expeditions, they are NOT non-guided. Our IMG Everest goal is to meet the needs of our customers with programs that combine the best attributes of both Sherpa and western leadership, at competitive prices. There are many different styles of guiding on Everest, and they are not the same. At the \$41,500 price we offer a 1:1 personal Sherpa guide assigned exclusively to you for the expedition. For \$56,500 we offer the 1:1 personal Sherpa guide plus the western guide at a 4:1 ratio. For \$111,500 you get 1:1 western guide. Lots of choices depending on what you want, what you need, and what you want to spend! The Sherpas that work for IMG are some of the very best Everest climbers, period. In order to compare different styles of Everest programs you need to understand who is going to be actually climbing with you and what support will be available if there is a problem. These are fair questions to ask of any company, and you should be comfortable with the answers you receive.

IMG Summit Statistics for NON sherpa climbers

2006-- 2012 IMG EVEREST climbers statistics	Total clients and western guides to Base Camp	HIGHPOINT						Total number making summit bid from Col	% of climbers reaching BC that make the summit	% of climbers from COL that make the summit	Number of CLIENT summiters	% CLIENT summiters from Col (of all climbers making bid)
		BC	C2	C3	C4	Balcony	Summit					
2006	16	0	2	0	0	2	12	14	75.00	85.71	10	83.33

IMG Everest Summiters List: click the “Summit Digits” link in the right column on our main Everest page: <http://www.mountainguides.com/everest-south.shtml>

IMG Everest Strategy

Our IMG guides and staff will work with you decide on the best strategy for you. We have seen many times that this is not the same for all climbers. It depends on variables like people’s health, fitness, acclimatization, aggressiveness, etc. For example, there is debate whether it is better to go up to C1 and then to C2 on your first rotation, or just to C1 and come back to BC. Some people do not like to stay at Camp 1 due to potential avalanche activity, so is it better to go all the way to Camp 2? How many nights should you stay at C2? Is it really necessary to sleep at C3 before summit bids and if so, how many nights? This kind of planning is not written in stone and will be affected by other factors such as your health, the weather, your fitness and how well you are acclimatizing, etc. For our IMG climbers, we offer to you considerable flexibility on the mountain to adapt your climb, especially down low. We would expect for the team to break up into a couple different “rotations” as each person finds the schedule that works best for themselves. Our IMG Everest climb is NOT a “free for all”. You are a member of an expedition team and everything you do on the mountain will have to fit into the larger picture, especially when it comes to occupation of Camps 3 and 4. Up high it will be especially important that everyone work together and communicate clearly. With IMG you will always be with your very experienced personal IMG Sherpa guide, with whom you will build a personal relationship over the expedition. With IMG you’ll always have other climbers and their Sherpa guides in the immediate vicinity and additional IMG guides and Sherpas in position to respond in an emergency. The size and strength of our IMG team means we can offer a high level of support to you at all phases of the expedition.

Trek to Base Camp, Acclimatization and Training

Getting to Base Camp strong and healthy is super important. Our climbing and trek teams will use lodges (“tea houses”) for the lower valley where they are of suitable quality, but above Pheriche we use tent camping so we can control our environment better. At Lobuche we camp in our beautiful Lobuche Peak Base Camp facility (with dining tent and Sherpa cook staff) for several days of prime acclimatization hiking, and then go direct to Everest Base Camp from here (climb Kala Pattar too). Once we get to Base Camp we will do training with the IMG on the ice seracs of the lower Khumbu Glacier to check climbers’ equipment and review climbing and rescue techniques. Then, we are back down to Lobuche Peak, an attractive 20,000 foot climb just down the valley from Base Camp. Lobuche Peak is a perfect warm-up climb for further acclimatization, practice of climbing techniques, and a good chance to get to know everyone better. After Lobuche Peak, we return to Base Camp and get ready to head up Mt Everest! Most climbers will do two “acclimatization rotations” on Everest, prior to the summit bids. Camp 1 is commonly used on the first rotation only, and is skipped on subsequent trips up the hill. The first trip up will go to C1 (19,500ft/5950m), then to C2 (21,000ft/6400m) for a couple nights, tag the Lhotse Face but not overnight at C3 (24,500ft/7470m), back to C2 for a night and finally back to BC. After a rest period the second rotation will return to C3, this time for an overnight stay at the camp. After the C3 overnight, we descend to BC to prepare for the summit bids. To reiterate, each phase of the IMG Everest expedition is an opportunity to evaluate our team members. We do not send people up high for summit bids unless they can demonstrate the skills necessary to climb safely and take care of themselves so that they are an asset to the team.

Leaving Everest Base Camp at the end of the expedition

After the Treks and Climbs, we plan the normal 3 day hike out from EBC back to Lukla with sherpas and porters for your duffels, so you travel with your luggage. For people who wish to trek out slower, they can leave EBC one day earlier and take 4 days. With the advent of more reliable helicopter service in Khumbu, some trekkers and climbers will chose to fly out (at their cost) by helicopter (to either Lukla or Kathmandu), or a combination (for example, trek to Pheriche and fly from there). The cost of the helicopter depends upon passenger load and whether the helicopter has to come from Kathmandu, or if it is already in the Khumbu area. If you accelerate your trek out (for example, hike out fast in 2 days) the porters (with your duffel bags) may not be able to keep up with you. You may also get separated from your luggage if you fly out by helicopter (payload weight restrictions). Please note that at the very end of the expedition, when many expedition teams are all leaving Base Camp at the same time (often complicated by poor weather as the monsoon approaches) the duffel bag situation can also become an issue (airlines will prioritize passengers over baggage on Lukla flights). We will get your duffel bags to Kathmandu by porter and flights as best as we can. If you depart Kathmandu for home before your duffel bags arrive back to Kathmandu, we can have them shipped home to you, but this will be at your cost.

Icefall

When we head up the Icefall, we break up into two person climber/Sherpa teams. We want to minimize unnecessary stopping and waiting in this dangerous area, and we have found the two person climber/Sherpa teams the best way to allow climbers to keep moving, so you are not waiting for slower climbers or slow groups. Each climber/Sherpa team is issued radios and a rescue rope (the Sherpa will normally carry the rope and radio). We have required check in points along the route, and this is logged at BC. You are on an open frequency, so you know when the climbers ahead and below you have passed a check point. There are many climbers and Sherpas, from many teams, moving up and down in the Icefall and it all gets confusing. You do not want to get stuck behind a big slow group! Each climber stays with their Sherpa who knows the route well, allowing maximum flexibility in the Icefall to negotiate steep spots and move around large slow groups. We do not allow climbers to climb solo. Climbing the Icefall quickly and smoothly is the single most important thing you can do to minimize risk.

Camps 1,2,3,4

At Camp 1 and Camp 2 we have large a kitchen/dining tents, gear storage tents (you can leave items here), and sleeping tents with closed cell pads (two persons per tent). Camp 1 is normally utilized on the first acclimatization rotation, but most climbers will skip it on the second time up, going straight through from BC to Camp 2. Generally the Sherpas will do all of the cooking/melting at Camp 1, 2, 3, and 4. At South Col we keep a dedicated Sherpa there just to cook, melt, and monitor the radio during the climb.

Personal Gear and Pack weights

Generally speaking, you will only need to carry the items which you require during the day while climbing. The Sherpas will carry loads (including a reasonable amount of your personal gear) between the camps. When you are using oxygen you will never carry more than one cylinder and regulator (16lbs/7.3kg).

Sleeping bags

Everest and Lhotse climbers need to bring two sleeping bags, one for Base Camp and one for the higher camps. Sherpas will assist you to move your sleeping bag between camps. We have warm down bags available for rent (\$200). Please let us know well ahead of time if you want to rent a sleeping bag.

Communications

We utilize VHF radios and satellite phones to maintain good comms, ensuring that IMG climbers, guides, and Sherpas work very closely together as a team. Each climber/Sherpa team is issued a handheld radio. We constantly monitor the radio 24/7 anytime climbers are on the mountain and we have required check in places/times and logging of all transmissions.

Cell phones and Internet

There is cell phone coverage in Kathmandu and Khumbu all the way up to Everest Base Camp which will work with GSM enabled phones (still spotty in some locations). You can purchase cheap GSM phones and local sim cards in Kathmandu and scratch minutes which can be loaded onto the phone. There are several "internet cafes" along the way to Base Camp. At EBC IMG will provide wireless internet access on a subscription basis (projected to be \$200 per person)..

Oxygen

Our IMG cylinders hold 1800 liters, which is enough for 10 hours @ 3 liters per minute (LPM). Each bottle and regulator weighs about 16lbs/7.3kg total. You will never carry more than this. We use the "Top Out" masks with carbon fiber composite cylinders – the "state of the art". For the summit bid we provide oxygen for sleeping at Camps 3 and 4 @ 1 LPM and climbing during the day @ 3LPM. This is considered quite a generous flow rate. Most climbers will use about 7200 liters total on the summit bid, from Camp 3 to the top and back to Camp 3, but we have more oxygen if necessary for emergency. For the climb to the summit you start with a full bottle at the Col and use about half of it on the way up to the Balcony (it is usually about a 5 hour climb to Balcony). You will switch to another full bottle at the Balcony and leave the half full bottle at Balcony for emergency back-up. Leaving the Balcony with a full bottle you go to the summit and back to the Col (normally this is about 8 hours). With our system you do not need to do a bottle change at the South Summit (there have been many cases of missing/lost/stolen bottles from here over the years). We also send backup oxygen, masks, and regulators up high with the Sherpas for emergency. On summit bid we have additional Sherpas who will carry oxygen just up to the Balcony, and who will then descend back to the Col to wait in reserve in case of emergency up high. This is an important safety aspect – having climbers ready at the South Col to support climbers in trouble up high.

Extra oxygen

We can provide another cylinder delivered at the South Summit which enables climbing @ 4LPM on summit day. Cost is \$5000, but we need to know before the expedition...you cannot order "on the spot"! Many climbers have asked about "practicing" at home with a mask. The TopOut mask (which we use on Everest) is built on the 3M 6000 series half facepiece respirator body (you can Google that) and doing workouts at home with the 3M mask will simulate some of the issues using oxygen. For climbers familiar with scuba diving, remember the necessity to breathe easy and steady, don't pant, just focus on moving the air efficiently. Check how the mask fits with your goggles.

Weather Forecasting

IMG subscribes to weather forecasting by Michael Fagin in Seattle (www.everestweather.com) We have worked with Michael for many years and he does an excellent job tracking multiple weather forecast models and providing custom forecasting for us. We also subscribe to the Swiss Metrotest service. This enables us to provide the best weather forecasting available to our IMG climbers!

Rescues

Our first priority is always going to be supporting our fellow IMG climbers. We are also willing to assist with other teams that need help with rescue, but this will take second priority to our IMG climbers. At and below Camp 2 the cost of a helicopter evacuation depends on the type of helicopter involved, the amount of flight time, and the number of landings. The Eurocopter AS350 B3 helicopters now available in Nepal are very capable and very expensive. We **REQUIRE** a [rescue insurance policy](#) that will cover a minimum of \$10,000 for TREKKERS and \$30,000 for CLIMBERS.

“I wanted to take this opportunity to thank you and your entire staff for running such a great Everest program the last two years... Ang Jangbu's management is perfect. Our Sherpa team is beyond outstanding. I saw some crazy things on summit day by other teams and was so proud to be with IMG!”

—Dr. Tim W.

“After close to 2 months on the mountain and seeing all the other expeditions, their resources and how they operate, I knew that I had chosen the best...”

—Zach Z.
